

Spring 2016

AUDITORIO DE LUGO

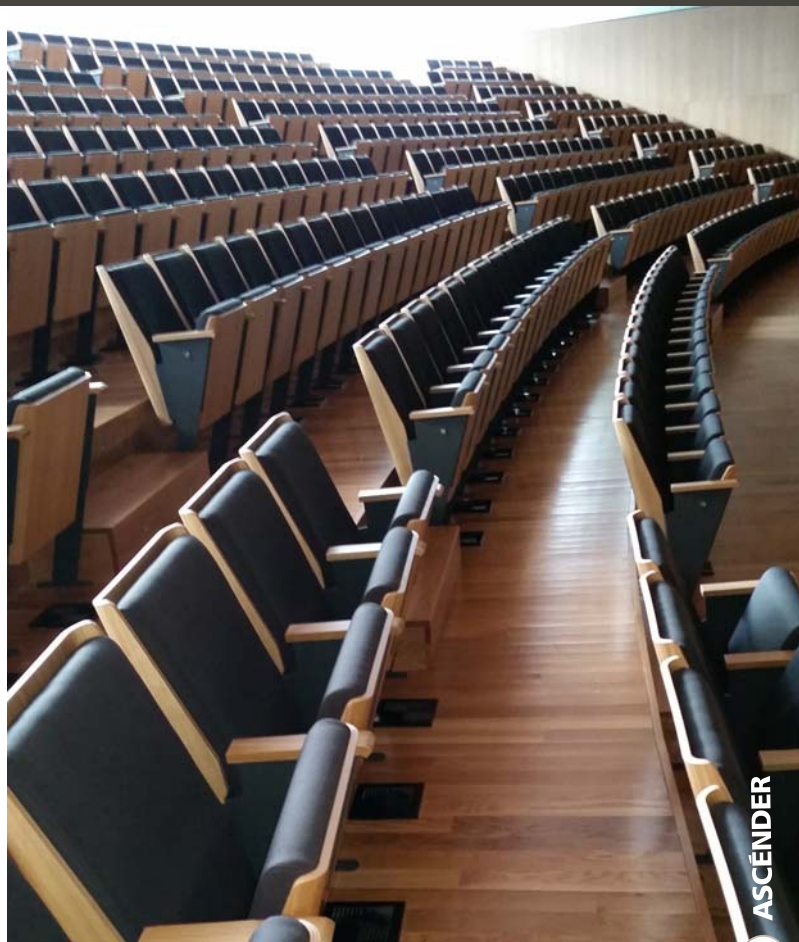

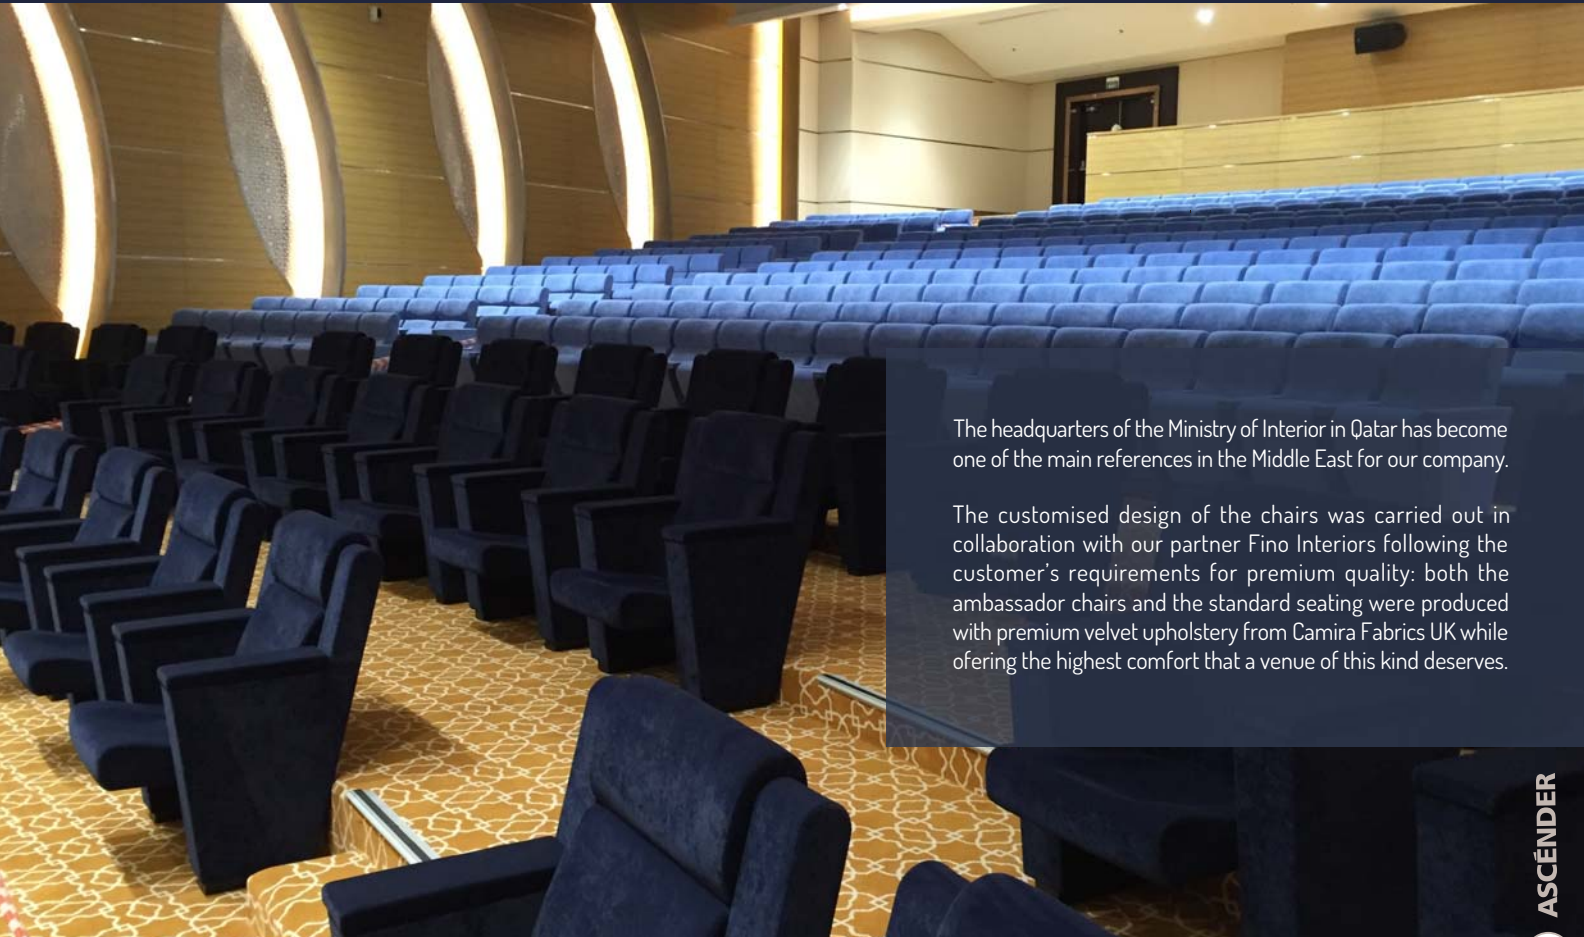

The new Auditorium of Lugo was born as the main building of the “Plan Hurbe” Project, and will probably become the most important public building of Lugo. It was designed by the Madrid based architectural studio Paredes Pedrosa and hosts two music halls of 900 and 300 seats located over the mountain slope – while facing the garden, both venues get all natural light from outside.

The key element of the slim chair used are the walnut backrest and seat shells which seem to “fly” over the venue – they are fixed to the floor with two slim laser cut steel plates that also act as support for the solid wooden armrests.

The headquarters of the Ministry of Interior in Qatar has become one of the main references in the Middle East for our company.

The customised design of the chairs was carried out in collaboration with our partner Fino Interiors following the customer's requirements for premium quality: both the ambassador chairs and the standard seating were produced with premium velvet upholstery from Camira Fabrics UK while offering the highest comfort that a venue of this kind deserves.

RIVERSALTES (FR)

Memorial du Camp de Rivesaltes

Rudy Ricciotti 

The Camp de Rivesaltes, also known as Camp Maréchal Joffre, was used as a refugee camp for Spanish, Jews and Algerians prisoners which were during WW2 were later on transferred to the to be murdered.

The selected architect for the design of this particular memorial / museum, Mr Rudy Ricciotti, said his main purpose was preserving this painful memory so future generations may recall it and get a better knowledge of our history "NEVER FORGET". Still a shame European countries have not learnt the lesson yet.

Bespoke benches upholstered in fine leather and combined with oak wooden finish from ASCÉNDER seating.
